

Gerard Climbing up to The Window

Update 17 April 2005

Now that it is warmer here, Gerard can crawl out onto the balcony. He has been doing the same sort of thing for the last 3 weeks, pulling himself up onto the windowsill. Up to now, he has only been pulling himself up into "highkneeling", but yesterday, he pushed up much higher with his arms and legs, and he was almost standing – of course his toes are turned down, like a ballerina pointing her toes, so he can't really put weight on the bottom of his feet, the weight is on the top of his toes. I managed to video it beautifully. I then wanted to photograph him, and I have a lovely series of photos, just not of him pushing up into the almost standing position. I tried everything to persuade him to do it again, but he refused! I photographed the video tonight, it is a bit fuzzy, but you can see what he is doing...
